A Format of Abstracts for
Joint WS of URSI-K and ICNIRP to be Held in Paris, France, August 29-30, 2013

Principal Author Name[1], <u>Coauthor Name[2]</u>, Coauthor Name[3]

[1]Affiliation of first author (to be prime contact) followed by complete mailing address (including country) and e-mail
[2]Affiliation (in this case underlined because expected to be presenter) followed by complete mailing address (including country) and e-mail
[3]If affiliation is identical, include separate e-mail with one of the above affiliations

1. Introduction

The abstracts for the Joint WS of URSI-K and ICNIRP, to be held August 29-30, 2013, will be published electronically. The following instructions provide guidelines for preparing the paper in the required electronic format. Each submission should resemble this page format and style when completed.

2. Submission Requirements

Publication of an abstract in the electronic proceedings is contingent upon the successful submission by **August 15, 2013**. The abstract needs to follow below conditions:

• An abstract should include at least 200 words in length;
• An abstract should be limited within 1 page of A4-size paper.

3. Format

Please set your word-processing software for standard A4-size paper. Margins should be set to 1 in (2.54 cm) on all four sides. Set the first three levels of tabs at 1 cm, 2 cm, and 3 cm. The text should be formatted in a single column, left and right justified.

Color is permitted in the proceedings, although its use should generally be restricted to figures.

3.1 Figures and Tables

Figure captions should be below the figures; table captions should be above the tables.

4. References

References should be numbered consecutively in the order in which they are first cited in the text. Citation in the text is done using the reference number in square brackets [1]. The sentence punctuation follows the brackets at the end of a sentence. Multiple citations are handled as follows: [1, 3-5, 13, 14]. In the list of references, list all authors' names. Do not use et al. unless there are more than six authors. Some examples are shown below:

1. G. Eason, B. Noble, and I. N. Sneddon, "On Certain Integrals of Lipschitz-Hankel Type Involving Products of Bessel Functions," *Phil. Trans. Roy. Soc. London,* **A247**, April 1955, pp. 529-551.

2. J. Clerk Maxwell, *A Treatise on Electricity and Magnetism, Volume 2, Third Edition*, Oxford, Clarendon, 1892, pp. 68-73.
